

MARSELIS

Design by kaschkasch

Marselis is a family of table and floor lamps, based around a circular disc of light that can swivel and tilt in a number of directions, creating both an indirect ambient and direct task light source. The lamp is made from die cast aluminium and steel, powder coated in a number of a matt colours. The light source is an injection moulded polycarbonate lens which conceals a flat panel of light, creating a balanced and even diffusion of light.
